Frontend Developer with a strong foundation in modern web development and hands-on experience building responsive, user-friendly web applications. Passionate about creating intuitive digital experiences, solving real-world problems, and continuously improving technical skills. Eager to contribute to a collaborative team while delivering high-quality and scalable solutions.

EXPERIENCE

Full Stack Developer (Laravel & Angular)

Kupondole, Lalitpur

Lele Ventures

Jan, 2026 - Present

- Developed and maintained a multi-tenant SaaS-based HR Management System using Laravel and Angular, implementing tenancy architecture with stancl/tenancy and role-based access control using Spatie permissions.
- Built and managed a centralized system supporting multiple tenants with features such as user management, CRUD operations, subscription plans, and billing functionality.
- Developed a Book Printing Management System with Laravel, Blade, and JavaScript, handling end-to-end job creation workflows including form-based input for printing specifications.
- Implemented an intelligent suggestion engine to recommend paper types and GSM based on user inputs, improving decision-making efficiency for printing jobs.
- Designed and integrated a cost estimation engine to calculate per-book and total printing costs dynamically based on selected parameters.
- Redesigned and refactored the official website for Lele Ventures, improving UI consistency, performance, and backend structure for better maintainability.

Software Developer Intern

Naxal, Kathmandu

BitsKraft

Sep, 2024 - Present

- Developed responsive frontend interfaces using React.js, implementing reusable UI components with Material UI, Tailwind CSS, HTML, and CSS.
- Identified, debugged, and resolved software issues to ensure system stability and performance.
- Designed and developed new features to enhance application functionality and improve user experience.

PHP Intern

Bakhundole, Lalitpur

Brand Builder

Jun, 2024 - Aug, 2024

- Developed custom tools and functionalities for WordPress plugins using core PHP.
- Worked extensively with WordPress plugin architecture, including hooks, shortcodes, and activation/deactivation workflows.

EDUCATION

BSc. (Hons) Computing

Kathmandu

The British College

Sep, 2019 - Sep, 2023

Science (H.S.E.B)

Lalitpur

Shree Bajrabarahi Secondary School

Jan, 2017 - Jan, 2019

S.E.E

Lalitpur

Emerald Higher Secondary School

Jan, 2004 - Jan, 2015

PROJECTS

HR Management System

- Developed a multi-tenant HR Management System using Laravel (API backend) and Angular (frontend) to support multiple organizations on a single platform.
- Implemented tenancy architecture using stancI/tenancy, enabling isolated data management for each tenant.
- Integrated role-based access control (RBAC) using Spatie Permissions to manage different user roles and permissions across tenants.
- Designed and developed a centralized system to manage tenant creation, CRUD operations, subscription plans, and billing workflows.
- Built core HR functionalities for tenants, including employee management, role assignments, and organizational data handling.
- Ensured secure and scalable architecture by separating central and tenant databases for better data isolation and performance.

CV Mandu (CV Builder Application)

- Developed a CV builder web application using React.js, enabling users to create and customize professional resumes easily.
- Implemented secure authentication and user management using Clerk for seamless sign-up and login experience.
- Designed a user-friendly interface for building, editing, and previewing CVs in real time.
- Focused on responsive UI and smooth user experience across different devices.

<https://cvmandu.com/>

Store It (Google Drive Clone)

- Built a cloud storage application similar to Google Drive using Next.js for the frontend and Appwrite for backend services.
- Implemented secure file upload, storage, and retrieval functionalities with user authentication and access control.
- Designed an intuitive UI for managing files and folders, enabling users to organize and access their data efficiently.
- Integrated backend services for authentication, database management, and file handling using Appwrite.
- Focused on responsive design and smooth user experience across devices.

<https://storage-management-peach.vercel.app/sign-in>

E-commerce Website

- Led a third-year college group project to build a responsive e-commerce website using PHP, Bootstrap, and MySQL.
- Implemented project management phases: Initiation, Planning, Execution, Monitoring, and Closing.
- Gained practical experience in web development and project management.

TRAINING/CERTIFICATIONS

Modern React with Redux (2024 Update)

2024

Udemy
