SUMMARY

I am a Software Engineer skilled in JavaScript, PHP, and frameworks like ReactJS and Laravel. I specialize in building dynamic, responsive web applications and scalable systems, with experience using Git for efficient development workflows.

EXPERIENCE

Backend Intern

AIDE ASCENT

February 2025 - June 2025

- Worked on a backend service using NestJS, focusing on seamless API integration. Successfully integrated the ResellerClub API to manage domain-related operations such as adding, editing, and deleting nameservers and DNS records.
- Implemented MongoDB for data persistence with Mongoose ODM, focusing on efficient schema design and performance.
- Used BullMQ (Redis-based queue system) for handling background jobs, such as event, mail scheduling.

Software Engineer

BitsKraft

September 2024 - December 2024

- Developed and maintained responsive and user-friendly frontend interfaces using ReactJS, Material-UI (MUI), and Tailwind CSS, ensuring a seamless user experience across devices.
- Utilized TypeScript to build robust components, reducing runtime errors and improving code maintainability.
- Designed and developed backend functionalities using Django, creating scalable and secure REST APIs for frontend consumption.
- Worked with MongoDB and MS SQL for database management, including designing schemas, writing queries, and optimizing database performance.
- Debugged and resolved software issues, ensuring system stability and improving overall application performance.

PROJECTS

Full-Stack E-Commerce Website

- Designed and developed a fully functional e-commerce platform with separate interfaces for **customers**, **traders**, and **administrators**.
- Utilized **PHP**, **Bootstrap**, and **MySQL** to create a responsive and user-friendly web application.
- Implemented **CRUD** (Create, Read, Update, Delete) operations for product management, user accounts, and order processing.
- Implemented project lifecycle phases: **Initiation**, **Planning**, **Execution**, **Monitoring**, and **Closing**.
- Collaborated with a team to deliver the project on time, improving teamwork and communication skills.
- Gained hands-on experience in full-stack web development, including frontend design, backend logic, and database management.

Real-Time Messaging Application (WhatsApp Clone)

- Designed and developed a real-time messaging app inspired by **WhatsApp**, replicating core features like chat, notifications, and user authentication.
- Utilized **Flutter** for cross-platform mobile app development, ensuring a smooth and responsive user interface.
- Integrated **Firebase** for backend services, including real-time database, user authentication, and cloud storage.
- Implemented real-time messaging functionality using Firebase Firestore for seamless communication between users.
- Gained expertise in state management, API integration, and debugging in a mobile development environment.

CRUD-Based Shopping Website

- Developed a **small-scale e-commerce website** with full **CRUD** (Create, Read, Update, Delete) functionality for managing products, users, and orders.
- Applied form validation and error handling to ensure data accuracy and improve user experience.
- Gained hands-on experience with web development using a modern PHP framework **Laravel**.
- Followed **MVC architecture** to separate business logic, presentation, and data layers for better scalability.

EDUCATION

BSc. (Hons) Computing	
The British College	2019 - 2023
Science (H.S.E.B)	
Shree Bajrabarahi Higher Secondary School	2017 - 2019
S.E.E	
Emerald Secondary School	2004 - 2015

SKILLS

- Frameworks and Libraries:**
- Frontend - ReactJS, VueJS, Material UI, NextJS
 - Backend - Laravel, NodeJS, ExpressJS, NestJS, Swagger, Postman
- Programming Languages:** Javascript, PHP, Typescript
- Web Technologies:** HTML, CSS, Bootstrap, Tailwind
- Database:** MySQL, MSSQL, MongoDB
- Tools and Platforms:** Git, MacOS, Windows
- Design:** Canva, Figma, Photoshop, Illustrator
